CURRENT VERSION OF THE CLAIMS

The following listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

- 1. (previously presented): An optical member in which a surface of an optical material is bonded to and covered with a transparent protective film having an outer surface roughness Ra of from 0.03 to 1 µm that does not substantially alter the transparent properties of the protective film, wherein the protective film comprises a protective base and an adhesive layer disposed on the protective base so that the protective base can be released together with the adhesive layer from the optical material.
- 2. (previously presented): The optical member according to claim 1, wherein the protective film is disposed on one surface of the optical material, and a separator is provided on an adhesive layer disposed on the other surface of the optical material so that the separator can be released from the adhesive layer.
- 3. (original): The optical member according to claim 1, wherein the optical material comprises a polarizing plate.
- 4. (previously presented): The optical member according to claim 1, wherein the optical material comprises a polarizing plate, and at least one of a retardation plate and a brightness enhancement plate.

Serial Number: 10/015,991 Group Art Unit: 2872

5-8. (canceled)

9. (original): A liquid crystal display having an optical member according to claim 1.

10. (previously presented): The optical member according to claim 1, wherein the protective film has an outer surface roughness Ra of from 0.04 to 1 μm .

11-16. (canceled)

17. (withdrawn): An optical member according to claim 3, wherein the polarizing plate has a transparent protective layer on one or both faces of a polarizing film.

18. (withdrawn): The optical member according to claim 17, wherein the protective film is disposed on one surface of the optical material, and a separator is provided on the other surface of the optical material via an adhesive layer.

19. (withdrawn): The optical member according to claim 17, wherein the optical material comprises at least one of a retardation plate and a brightness enhancement plate.

20. (withdrawn): The optical member according to claim 17, wherein the protective film has an outer surface roughness Ra of from 0.04 to 1 μ m.

Serial Number: 10/015,991 Group Art Unit: 2872

21. (canceled)

- 22. (withdrawn): The optical member according to claim 17, wherein the separator has an outer surface roughness Ra of from 0.05 to 1 μm .
 - 23. (withdrawn): A liquid crystal display having an optical member according to claim 17.
- 24. (withdrawn): An optical member according to claim 17, wherein a reflecting layer having a fine undulating structure is disposed on the protective layer.
- 25. (withdrawn): An optical member according to claim 24, wherein the reflecting layer is formed by attaching metal directly onto the surface of the protective layer.
 - 26. (withdrawn): A liquid crystal display having an optical member according to claim 24.
- 27. (previously presented): An optical member according to claim 1, wherein the protective film has an outer surface roughness Ra of from 0.05 to 1 μ m.
- 28. (previously presented): An optical member according to claim 1, wherein the protective film has an outer surface roughness Ra of from 0.06 to 1 μ m.

Serial Number: 10/015,991 Group Art Unit: 2872

29-35. (canceled)
